

Increase Home Care Rates by 10% in the 2024 Budget

Personal Assistive Services
Pediatric Shift Nursing

Adult Shift Nursing
Pediatric Home Health Aide

Pennsylvania's home care industry has a \$25.6B economic impact.¹

PA's number of individuals who are 65 years+ is the **5th** largest senior population in the USA.²

70% of Pennsylvania adults are concerned that low home health aide wages will lead to a shortage of aides in the state.⁷

The home care industry is at its limit. It cannot continue doing more with less.

Pennsylvanians want home care, and it's what the state needs.

- The cost of care has increased by **↑ +8.33%** since 2020.⁴
- DHS reported as of November 2022 that, on average, **14%** of authorized shifts are uncovered due to staffing shortages.⁵
- There is a projected shortage of **376,800** direct care workers by 2030.⁶
- The annual cost for institutionalized care is **↑ 117%** higher than the annual cost for home care.⁷

CALL TO ACTION:

Help us help more Pennsylvanians by increasing home care rates by 10%
